Subject: Notice of File Closure for Small Mining Project, The Duncce Project, S/045/047,  
Tooele County, Utah

Dear Mr. Coombs:

On August 4, 2003, we received your request to inspect and close the file for The Duncce small mining project located in Tooele County. The file could not be closed until a site inspection was performed to verify that there was no mining related disturbance at the site.

On May 4, 2004, that site inspection was performed (inspection memo attached) and it was determined that the file could be closed and the permit released. You are hereby released by the Division from further mining or reclamation responsibilities at this site. You are not required to pay the \$150.00 permit fee as recently requested.

Because this project was located on United States Forest Service lands, release by the Division **does not** relieve you of any responsibility the USFS may require. If you have not already done so, you should contact them to receive their official release as well.

If you wish to conduct any future mining related activity in this area, you will need to submit a new notice to the appropriate agency(s), pay the Division permit fee, and receive written approval(s), prior to creating any disturbance.

If you have any questions or concerns regarding this action, please contact me at (801) 538-5. Thank you for your time and consideration in completing the required reclamation on this project.

Sincerely,

Tom Munson  
Senior Reclamation Hydrologist
